

Mopex LEAN Systems

Eliminate waste. Improve flow. Increase operational performance.

Turn operational inefficiency into measurable performance improvement.

The Business Problem

Common LEAN Challenges

- High process waste
- Long lead times
- Inconsistent workflows
- Reactive firefighting
- Poor process visibility
- Limited data-driven improvement
- Lack of standard work
- CI initiatives losing momentum

LEAN Maturity Assessment

Every Mopex project begins with a baseline to track ongoing, step-by-step improvements. It

starts with a 7-Dimension

Diagnostic for the LEAN

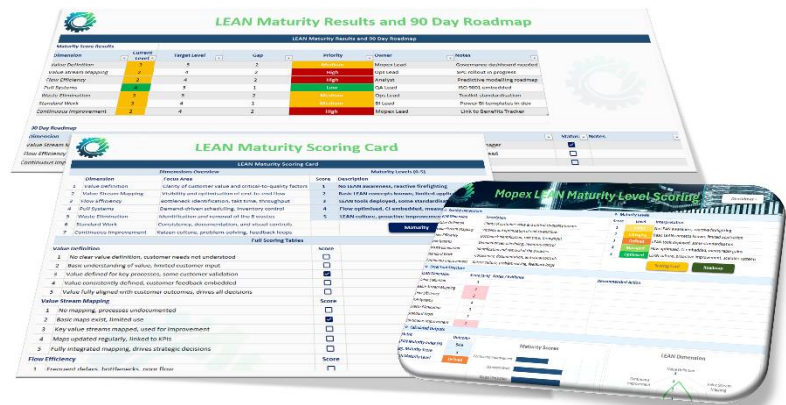

framework, which produces a

Maturity Score. This score

marks our “As-Is” starting point

and helps shape the roadmap

toward the “To-Be” state.

Level	Description
1. Initial	No LEAN awareness, reactive firefighting
2. Emerging	Basic LEAN concepts known, limited application
3. Defined	LEAN tools deployed, some standardisation
4. Managed	Flow optimised, CI embedded, measurable gains
5. Optimised	LEAN culture, proactive improvement, scalable systems

Mopex LEAN Maturity Scoring Tool

Mopex LEAN Transformation Flow

Mopex LEAN Project Framework

Purpose:

Deliver measurable operational improvements by applying Lean principles to reduce waste, improve flow, and enhance customer value.

Use Cases

Manufacturing and service process optimisation

Quality and compliance improvement

Cost reduction and efficiency gains

Cross-functional workflow redesign

Service Description

◊ Phase 1: Project Intake & Scoping

Purpose: Define the opportunity, scope, and success criteria.

◊ Phase 2: Current State Analysis

Purpose: Understand the process, identify waste, and validate pain points.

◊ Phase 3: Root Cause Analysis

Purpose: Validate causes of inefficiency or defects.

◊ Phase 4: Solution Design & Kaizen Delivery

Purpose: Implement targeted improvements through rapid cycles.

◊ Phase 5: Control & Sustainment

Purpose: Lock in gains and prevent backsliding.

Mopex LEAN Toolkit (Suggested Assets)

PowerPoint

Purpose

Define scope and objectives

Map current and future states

Identify and categorise waste

Analyse and prioritise causes

Structure rapid improvement

Sustain gains and monitor KPIs

Quantify impact and payback

Communicate results to client

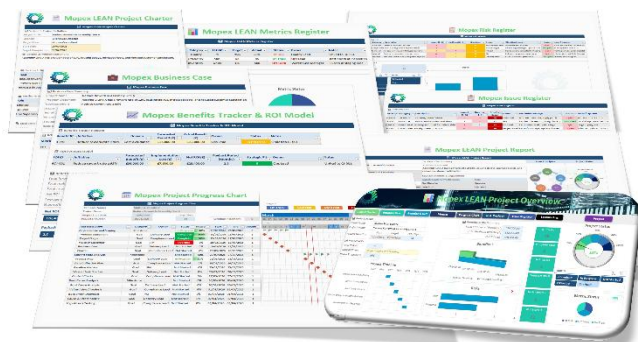

Mopex Frameworks break projects into clear, trackable phases, whether guided by a Mopex consultant collaborating with the client or handled directly by the client using their own Mopex LEAN Framework package.

Typical Example:

1. Value Stream Assessment
2. Waste Identification
3. Process Mapping
4. KPI Baseline Setup
5. Improvement Deployment
6. Standardisation
7. Sustainment & Governance

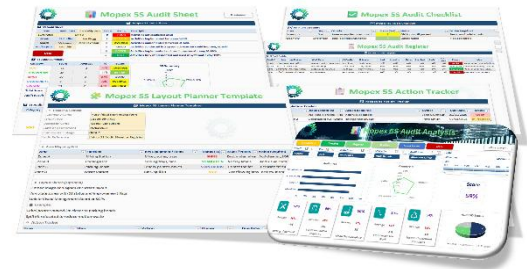

Mopex LEAN Project Tracking

LEAN Project Tracking Documents are connected to a 'Client' Dashboard, giving up-to-date visibility into their LEAN project. Check out the example video below to see the "active" dashboard in action.

Mopex LEAN Toolkits Available

Mopex LEAN toolkits, or “Suggested Assets,” are included in the LEAN Framework contract and are commonly used for project consulting. There are also many other tools available for LEAN Continuous Improvement, which can be bought individually or as part of the complete LEAN Framework package.

Mopex Modular Templates

Branded, reusable templates and dashboards sold as standalone products or add-ons.

- **Modular & Scalable:** Use standalone or combine for full frameworks (LEAN, DMAIC, QMS, H&S, PMO, Data Analysis).

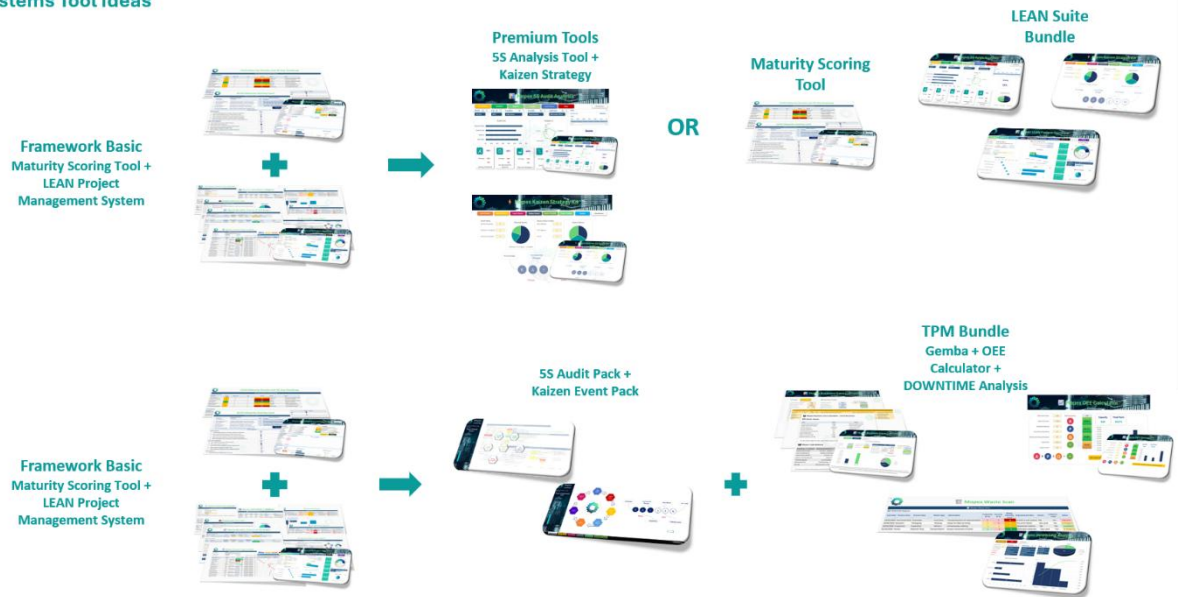

- **Audit-Ready & Branded:** Designed for compliance, client delivery, and executive presentation.

- **KPI-Driven:** Templates feed into dashboards that visualise performance, ROI, and risk.

- **Cross-Domain Utility:** Applicable across manufacturing, healthcare, logistics, finance, and more.
