

Mopex QMS Framework

Transform quality compliance into operational excellence.

Establish scalable quality systems that improve compliance, process consistency, audit readiness, and operational performance through practical governance frameworks, dashboards, and implementation tools.

The Business Problem

Common Quality Challenges

- Inconsistent process adherence
- Weak document control
- Reactive quality management
- Repeat non-conformances
- Poor CAPA visibility
- Audit preparation issues
- Fragmented quality reporting
- Limited KPI ownership
- Spreadsheet dependency
- Lack of continuous improvement integration

QMS Maturity Assessment

Every Mopex project begins with a baseline to track ongoing, step-by-step improvements. It starts with a 7-Dimension Diagnostic for the QMS framework, which produces a Maturity Score. This score marks our “As-Is” starting point and helps shape the roadmap toward the “To-Be” state.

Level	Description
1. Initial	No formal QMS, reactive quality control
2. Emerging	Basic QMS elements, limited integration
3. Defined	Documented QMS, partial implementation
4. Managed	Audited, reviewed, and actively improved
5. Optimised	Embedded QMS, proactive improvement, scalable

Mopex QMS Maturity Scoring Tool

Mopex QMS Delivery Framework

Mopex QMS Implementation Project Framework

Purpose: Deliver a compliant, scalable, and auditable QMS aligned to ISO 9001 or sector-specific standards, enabling process control, risk mitigation, and performance improvement.

Use Cases

ISO 9001 implementation

Supplier quality and audit readiness

Internal QMS redesign or upgrade

Integration with H&S, ESG, or operational frameworks

Quality maturity uplift across functions

Service Description

Phase 1. Diagnostics and GAP Analysis

Purpose: Assess current state against standards and best practices.

Phase 2. System Design

Purpose: Build the structure, policies, and procedures.

Phase 3. Implementation and Training

Purpose: Deploy systems and build capability.

Phase 4. Monitoring and Control

Purpose: Ensure systems are working and sustained.

Phase 5. Certification and Continuous Improvement

Purpose: Prepare for external audits and embed CI.

Mopex QMS Toolkit (Suggested Assets)

Asset

Format

Purpose

QMS Diagnostic Checklist

Excel

Assess current compliance status

SOP Template Pack

Word/Excel

Standardise documentation

Document Control Register

Excel/Notion

Track versions and access

Training Matrix & Tracker

Excel

Map and monitor competencies

KPI Dashboard

Excel/Power BI

Visualise quality performance

Audit Evidence Pack

Word/Excel

Prepare for certification

Management Review Slide Deck

PowerPoint

Present QMS performance and risks

Certification Checklist

Word/Excel

Validate readiness for audit

Mopex Frameworks break projects into clear, trackable phases, whether guided by a Mopex consultant collaborating with the client or handled directly by the client using their own Mopex QMS Framework package.

Typical Delivery Flow

1. QMS Diagnostic
2. Gap Assessment
3. Governance Framework Setup
4. SOP & Documentation Structure
5. KPI & Dashboard Deployment
6. CAPA & Compliance Integration
7. Continuous Improvement Governance

Mopex QMS Project Tracking

QMS Project Tracking Documents are connected to a 'Client' Dashboard, giving up-to-date visibility into their QMS project. Check out the example video below to see the "active" dashboard in action.

Mopex QMS Toolkits Available

Mopex QMS toolkits, or “Suggested Assets,” are included in the QMS Framework contract and are commonly used for project consulting. There are also many other tools available for QMS Continuous Improvement, which can be bought individually or as part of the complete QMS Framework package.

Mopex Modular Templates

Branded, reusable templates and dashboards sold as standalone products or add-ons.

- **Modular & Scalable:** Use standalone or combine for full frameworks (LEAN, DMAIC, QMS, H&S, PMO, Data Analysis).

- **Audit-Ready & Branded:** Designed for compliance, client delivery, and executive presentation.

- **KPI-Driven:** Templates feed into dashboards that visualise performance, ROI, and risk.

- **Cross-Domain Utility:** Applicable across manufacturing, healthcare, logistics, finance, and more.
